

# Hospital Database – PostgreSQL SQL Queries

## SQL Assignment

```
-- Create Tables
DROP TABLE IF EXISTS hospital;
CREATE TABLE hospital (
    Hospital_name VARCHAR(100),
    Location VARCHAR(100),
    Department VARCHAR(50),
    Doctors_Count INT,
    Patient_Count INT,
    Admission_Date DATE,
    Discharge_Date DATE,
    Medical_Expenses NUMERIC(10,2)
);
SELECT * FROM hospital;

-- Total Number of Patients
SELECT SUM(patient_count) AS total_patient
FROM hospital;

-- Average Number of Doctors per Hospital
SELECT AVG(doctors_count) AS avg_doctors_count
FROM hospital;

-- Top 3 Departments with the Highest Number of Patients
SELECT department, SUM(patient_count) AS total_patient_per_department
FROM hospital
GROUP BY department
ORDER BY total_patient_per_department DESC
LIMIT 3;

-- Hospital with the Maximum Medical Expenses
SELECT hospital_name, SUM(medical_expenses) AS total_expenses
FROM hospital
GROUP BY hospital_name
ORDER BY total_expenses DESC
LIMIT 1;

-- Daily Average Medical Expenses
SELECT
    hospital_name,
    medical_expenses / NULLIF(discharge_date - admission_date, 0) AS daily_expenses
FROM hospital;

-- Longest Hospital Stay
SELECT hospital_name, location, department,
    discharge_date - admission_date AS stay_total
FROM hospital
ORDER BY stay_total DESC
LIMIT 1;

-- Total Patients Treated Per City
SELECT location, SUM(patient_count) AS pat_per_city
FROM hospital
GROUP BY location;

-- Average Length of Stay Per Department
SELECT department, AVG(discharge_date - admission_date) AS avg_stays
FROM hospital
GROUP BY department;

-- Identify the Department with the Lowest Number of Patients
SELECT department, SUM(patient_count) AS lowest_patient
FROM hospital
GROUP BY department
ORDER BY lowest_patient
LIMIT 1;

-- Monthly Medical Expenses Report
SELECT
    DATE_TRUNC('month', admission_date) AS month,
```

```
SUM(medical_expenses) AS total_medical_expenses
FROM hospital
GROUP BY month
ORDER BY month;
```
